Kristen –

Thank you. The cost of the asphalt cap and the prescriptive cap made up the bulk of the cost. The cost of the asphalt pavement alone was \$3,817,239. In addition, O&M costs for on-site containment were much higher due to maintenance of both caps.

Best,

Mike

Mike – Thanks again for all your work on the FFS. May I ask you a baseline question for my

own understanding? I think people were surprised to see that off-site disposal was a cheaper options than on-site containment. Do you know generally why on-site containment is more? Is it the cost of clean fill for a cap?
